PROFILE

A detail-oriented & dependable engineering professional with hands-on experience in ICS, PLC programming, & project coordination across the power & manufacturing sectors. Skilled in DCS/SCADA systems, C&I troubleshooting, & ICS upgrades that enhance plant performance & OT cybersecurity. Known for analytical thinking, root-cause analysis, & proactive approach to solving technical challenges.

WORKING EXPERIENCE

General Operative | XPO Logistics (via Gap Personnel)

Feb 25 – Present

- Supported operational efficiency by maintaining accurate inventory data for >2,000 items through SAP, ensuring data integrity across warehouse systems
- Performed root-cause analysis & documented findings on damaged goods to support process improvements in warehouse workflow

Engineer | CLP Power HK Ltd

Oct 21 – Aug 23

Project Management, Process Control & Cyber Security Department

- Led >20 PCCS projects in power stations, managing planning, budgeting & scheduling to ensure on-time delivery while meeting scope & company standards
- Delivered key initiatives enhanced OT cybersecurity & plant control performance in power stations, reducing cyber risk & protecting 7208MW of generation asset
- Monitored contractor performance & collaborated with O&M teams to achieve technical delivery, handover & integration into operations
- Supported procurement, technical tendering & justified project investments to senior management to secure funding & achieve the £8M annual CapEx target

System Engineer | Control Automation Ltd

Jul 21 – Oct 21

Project Engineering, Project Department

- Delivered ICS projects at 3 client sites, handling planning, tendering, PLC/SCADA upgrades & integration, system design, site survey & execution til handover
- Built strong client relationships through field-level involvement by identifying site operations & future EC&I project opportunities to support long-term collaboration
- Prepared key project documents, e.g. architecture diagrams, I/O lists, technical proposals, test plans, aligned with client specifications. Coordinated system installation, FAT/SAT execution, end-user training & operational review

System Engineer Trainee | Green Island Cement

Oct 20 – Jul 21

System Custodian, System & Process Department

- Upgraded & maintained Honeywell DCS to support 84,000T clinker production annually, overseeing system performance by instrumentation calibration & process data analysis
- Troubleshot C&I faults & coordinated with O&M teams to uphold system reliability, while supporting production requests, e.g. GUI optimisation & logic modifications
- Developed control logic & conducted T&C activities for refurbishment projects, covering new plant infrastructure & E&M systems upgrades

Process Control Engineer | Green Island Cement

Oct 17 – Oct 20

Operation, Production Dept

- Managed cement manufacturing operations in CCR using DCS, optimising manpower & system resources to enable timely decision-making & operational efficiency

EDUCATION

2017
2013

BEng (Hons) Chemical and Biomolecular Engineering

The Hong Kong University of Science and Technology - HKUST

Ranked #36 globally – QS World University Rankings (2017)

2013

HK Diploma of Secondary Education Examination

Subject	HKDSE	GCSE Equivalent
Maths	Lv. 5*	Grade 8 / A*
Maths (Calculus)	Lv. 5	Grade 7 / A
Chemistry	Lv. 5	Grade 7 / A
Physics	Lv. 4	Grade 6 / B
