Learning

Procurement

QUALIFICATIONS

- Member of Society of Operations Engineer

- UK Full Driving Licence - Auto

- Red Cross Standard First Aid Certificate

EDUCATION

BEng (Hons) Chemical and Biomolecular
Engineering 2017

The Hong Kong University of Science and
Technology (Ranked #36 globally)

PROFILE

A detail-oriented and dependable OT engineering professional with hands-on experience in industrial plants across Europe and Asia, covering power generation, cement, and pharmaceutical sectors. Skilled in ICS, control logic design, OT asset evaluation, network architecture review, and cybersecurity compliance. Recognized for analytical thinking, structured documentation, risk-based decision-making, and a results-driven approach to enhancing system reliability and cyber resilience.

WORKING EXPERIENCE

OT Systems Assessment Engineer | Cognizant Technology Jul 2025 – Present

- Coordinated OT assessment with Reckitt site engineers in Hull, Mira & Taicang, managing schedules & deliverables within tight downtime periods to maximize survey efficiency
- Conducted OT asset & network assessments across production departments & QC labs, identifying vulnerabilities & risks while verifying compliance with IEC 62443
- Evaluated PLCs, HMIs & switches to document OT architecture & asset specifications producing structured deliverables, e.g. inventories, network maps & workflow diagrams
- Reviewed & validated configurations of DCS, SCADA & OT workstations, analyzing connectivity & settings to support configuration management & cybersecurity assurance
- Coordinated with Cognizant's offshore team & site engineers to validate findings & align outcomes with modernization & cybersecurity goals

Engineer | CLP Power HK Ltd

Oct 2021 – Aug 2023

Project Management, Process Control & Cyber Security Department

- Led 20+ PCCS projects in power stations, managing planning, budgeting & scheduling to ensure on-time delivery while meeting scope & company standards
- Delivered key initiatives enhancing OT cybersecurity & plant control performance in power stations, reducing cyber risk & protecting 7208MW of generation asset
- Monitored contractor performance & collaborated with O&M teams to achieve technical delivery, handover & secure integration into operations
- Supported procurement & technical tendering activities with justified project & cyber resilience investments to meet corporate security & reliability requirements

System Engineer | Control Automation Ltd

Jul 2021 – Oct 2021

Project Engineering, Project Department

- Delivered ICS projects at three client sites, handling system design, technical quotations, project planning, tendering, PLC/SCADA upgrades & systems integration until handover
- Built strong client relationships through hands-on site involvement, identifying future EC&I opportunities & promoting best practices in control system reliability & security
- Prepared project documents, including architecture diagrams, I/O lists, technical specifications, test plans, aligned with client specifications and cybersecurity standards
- Coordinated system installation, FAT/SAT execution & end-user training, ensuring secure configuration, network integrity & seamless operational handover

System Engineer Trainee | Green Island Cement

Oct 2020 – Jul 2021

System Custodian, System & Process Department

- Upgraded & maintained Honeywell DCS with ~22,000 I/O points, enhancing system performance by control loop tuning, sequence logic optimization & data analytics
- Troubleshoot C&I faults & coordinated with O&M teams to resolve process issues & implement logic & GUI enhancements in response to production requirements
- Designed control logic & executed T&C activities for refurbishment & E&M upgrade projects, improving system performance & reducing operational risks

Process Control Engineer | Green Island Cement

Oct 17 – Oct 20

Operation, Production Department

- Managed cement manufacturing operations in CCR using DCS, optimising manpower & system resources for real-time decision-making & process efficiency
